DEVELOPMENT EXPERIENCE & APPS BUILT

ReJam — Project Role: Front End Developer

<https://secret-dusk-70061.herokuapp.com/>

Web app for music lovers that sign in via Spotify. This gives users a chance to relive their night out at concert they attended or maybe want to see what music an artist played at a venue they missed. ReJam gives users the opportunity to create a setlist of music played in the exact order that an artist performed. This web application uses HTML5, CSS3, Javascript, jQuery, Materialize, Font Awesome, Ionic Framework, Express, JSON Query String, Request, Cookie-Parser, OAuth2, Tokens, Spotify API, Setlist.fm API, AJAX calls, Heroku.

Anonymous.Expressions — Project Role: Front End Developer

<https://hidden-mountain-42950.herokuapp.com/>

Mobile messaging app built in React, that lets users leave anonymous messages via google maps with a custom drop marker. We had a project duration of 1 week to complete. This application uses Javascript, jQuery, HTML5, CSS3, Bootstrap, Font Awesome, Google API, AJAX calls, Express, Moment, Hasha, Identicon, MySQL, Sequelize, Dicerware-Generator, Heroku.

Vacation Photowall — Developer

<https://vacationphotos-ab139.firebaseio.com/>

React web application that lets you post images via links. You can add messages or delete link images. This web application uses React, ES6, Firebase, React-Dom, React-Fontawesome, React-Redux, React-Router-Dom, React-Scripts, Redux, and Redux-Thunk.

ADDITIONAL WORK EXPERIENCE

Randy's Management Solutions Inc, Irvine CA — *Operations Manager*

MARCH 2016 - AUGUST 2017

Contract – Solve complex business problems by working directly with inmates, families and prison personnel of all levels to understand and troubleshoot issues and implement creative solutions to appease all parties. Build and manage simulated testing environments to assist and debug issues that arise in the field. Facilitated employee workloads and scheduled vendor deliveries to efficiently maximize time. Reduced vendor cost by 10%. Increased company profit margin by 27%. Managed three CDCR contract sites. Held quarterly meetings with CDCR Board of directors and IFC members, where I would address concerns, take feedback, implement ideas and solutions. Assist and prepare for CA State Department and Business Enterprise Program (BEP) owner audits.

Time Warner Cable, Garden Grove CA — *Field Service Tech*

JULY 2011 - MARCH 2016

Diagnose and troubleshoot RF levels on plant operations. Install and integrate various company services (digital video, wireless internet, VoIP telephone, and home security systems) with customer's equipment. Test company software applications on-site for successful two way communication with head-end. Operate testing tools and equipment like JDSU signal level meter with QAM analyzer, tone & probe, ohm/multimeter, wifi analyzer, foreign voltage detector, etc. Educated clients on company products, services and use of equipment. Awarded three times for six months of continuous 100% customer satisfaction.

C&J Energy Services, Compton CA— *Crew Worker (006)*

FEBRUARY 2007 - FEBRUARY 2009

Worked with heavy rig machinery and equipment such as tubing tongs, air slips, winch line, and power swivel. Service, maintenance, and test rig equipment. Became the lead for crew safety operations. Followed SOP for BOP blowout prevention. Assisted well supervisor on history and permit checks of upcoming oil wells to be worked on.
